**Form Practice - Group Activity**

1. After the radio buttons, create a drop-down list. Use the select element to do this labelled "Job Role" with the following option groups:
   - Web
     - Front-End Developer
     - PHP Developer
     - Python Developer
     - Rails Developer
     - Web Designer
     - WordPress Developer
   - Mobile
     - Android Developer
     - iOS Developer
     - Mobile Designer
2. After the drop-down, add some checkboxes labelled "Interests:" with the following options:
   - Development
   - Design
   - Business
3. Open the about.css file and create CSS styles to match the mock-ups in the next few pages.
   a. Form should have a max-width of 480px and should be centred along the left / right axis within the browser
   b. To create the numbered green circles, try border-radius and setting the value to 50%
   c. Style the focus state of the inputs.
   d. Do not worry about the exact look of the select menu when it is opened. It will look different depending on the browser and the operating system.
   e. Investigate the CSS border-radius property to create the rounded corners of the form.
   f. Add another Google font to replace the body font of the about page, use Roboto Condensed.
      i. Try to combine Playfair Display and Roboto Condensed into one <link> element.
